Shop	
	<p>Redirect: Confirm the "Order Now" button redirects to the listing page.</p>
Order Page:	

	Verify updated order modes: Home Delivery, Pickup, and Dine-In.
Home Delivery:	
	Check the functionality to add, edit, and delete addresses.
	Search Bar: Confirm the search bar works as expected.
Filters:	
	Categories and category filters should filter data properly.
	Updated price filters should display and filter products correctly.
	Updated tag filters should display and filter data accurately.
View Types:	
	Verify product listing displays correctly in 2G, 3G, 4G, Listing, and Compact views.
Product Listing:	
	Ensure product images are high-quality.
	Verify items can be added to the cart, and the subtotal updates correctly.
	On clicking images, a modal should open.
	For customizable and variant products, ensure the modal displays data accurately.
Checkout Page	
	Address: Confirm the updated address displayed matches the outlet address from the home page.
Login:	
	Verify login functionality using email or mobile number.
	Ensure OTP authentication works and allows entry of the customer's name.
Payment:	
	Confirm clicking "Pay Now" redirects to the payment gateway.
	Verify payment options are selectable and functional.
	Success Page
	WhatsApp Redirect: Confirm clicking "WhatsApp with Merchant" redirects to the WhatsApp chat.
	Track Order
Business Details:	
	Ensure the business branding logo is displayed.

	Confirm the updated address and branch mobile number are accurate.
Order Details:	
	Verify customer name, delivery mode, and order status are displayed correctly.
	Make Payment Online: Ensure alternative payment modes are available and functional.
Invoice:	
	Check that the "View Invoice" page displays the correct amount and grand total.
	Verify the "Download Invoice" button downloads the invoice accurately.
	Order History:
	Confirm updated order statuses are displayed (e.g., Pending, Completed).
My Orders	
	Redirect: Ensure the "My Orders" option redirects to the account page.
	Paid Orders:
	Verify paid orders display with consistent details.
	Confirm the "Track Order" action opens the correct page.
